**Description:**

LRS-200 series is a 200W single-output enclosed type power supply with 30mm of low profile design. Adopting the input of 115VAC or 230VAC(selectable by switch) ,the entire series provides an output voltage line of 5V,12V ,15V,24V,36V and 48V.

In addition to the high efficiency up to 90%,the design of metallic mesh case enhances the heat dissipation of LRS-200 that the whole series operates from -30°C through 70°C under air convection without a fan.Delivering an extremely low no load power consumption (less than 0.75W) , it allows the end system to easily meet the worldwide energy requirement,LRS-200 has the complete protection functions and 5G anti-vibration capability; it is complied with the international safety regulations such as TUV EN60950-1 , UL 60950-1 and GB 4943, LRS-200 series serve as a high price-to-performance power supply solution for various industrial applications.

- Note: 1. All parameters NOT specially mentioned are measured at 230VAC input, rated load and 25°C of ambient temperature.
2. Ripple & noise are measured at 20MHz of bandwidth by using a 12" twisted pair-wire terminated with a 0.1uf & 47uf parallel capacitor.
3. Tolerance : includes set up tolerance, line regulation and load regulation.
4. Line regulation is measured from low line to high line at rated load.
5. Load regulation is measured from 0% to 100% rated load
6. The ambient temperature derating of 5°C/1000 m is needed for operating altitude greater than 2000m(6500ft)
7. The power supply is considered as a component which will be installed into a final equipment. The final equipment must be re-confirmed that it still meets EMC directives. For guidance on how to perform these EMC tests.
