

## Features:

- · Universal AC input / Full range
- Built-in active PFC function
- · Protections: Short circuit /Over Load/ Over voltage / Over temperature
- · Cooling by free air convection
- · Output voltage and constant current level adjustable
- IP65 design for indoor or outdoor installations
- · Suitable for LED lighting and moving sign applications
- · Compliance to worldwide safety regulations for lighting
- · Suitable for dry / damp / wet locations
- 3 years warranty

DIMENSION: 196 × 63 × 39mm

## NOTE:

- 1. All parameters NOT specially mentioned are measured at 230VAC input, rated load and 25 °C of ambient temperature.
- 2. Ripple & noise are measured at 20MHz of bandwidth by using a 12" twisted pair-wire terminated with a 0.1uf & 47uf parallel capacitor.
- 3. Tolerance: includes set up tolerance, line regulation and load regulation.
- 4.. Constant current operation region is within 60% ~100% rated output voltage. This is the suitable operation region for LED related applications, but please reconfirm special electrical requirements for some specific system design.
- 5.Derating may be needed under low input voltage. Please check the static characteristics for more details.
- 6.Setup time is measured at cold start condition. Turning ON/OFF the power supply frequently may increase the set up time.

## Mechanical Specification

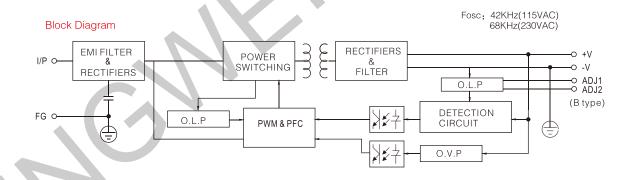

Unit:mm

IP65 rated. Output voltage and constant current level can be adjusted through internal potentiometer. (Can access by removing the rubber stopper on the case.)

Efficiency VS Load(48V Model)

CEN-100 series possess superior working efficiency that up to 91% can be reached in field applications.

## **Driving Methods Of LED Module**

This LED power supply is suggested to work in constant current mode area (CC) to drive the LEDs
